

# INDUSTRIAL PRINT INTEGRATION

Discover  
new territories  
for industrial print

24-25 November 2026  
Düsseldorf-Neuss

**50% NEWCOMER DISCOUNT**

# ABOUT IPI

For decades, industrial print and fluid deposition have driven innovation in manufacturing.

Today, these technologies are embedded in creating **functional components, smart surfaces, and next-gen products** — from printed electronics and IoT to automotive, bio-medical, and additive manufacturing.

The expansion of AI-powered automation, ultra-precision deposition, and high-viscosity jetting across diverse surfaces and markets demonstrates print's unmatched versatility. Yet, many industries are just beginning to unlock its potential by integrating, combining, or evolving these technologies.

**Industrial Print Integration (IPI) introduces partners to a world of manufacturing possibilities.** We showcase the adaptability of print processes — from large-scale to micro-precision, high-speed to customisation, and mass production to on-demand — proving that print is not just a tool, but a transformative force in modern industry.

# KEYNOTES

- **Mapping the Market:** Where is Industrial Printing Headed Next?
- **Biology-in-a-Smart-Box:** Biomedical Solutions Enabled by Multimaterial 3D Printing
- **Future of Car Customisation:** Digital Print Meets Robotic Precision
- **Printing 1  $\mu\text{m}$  Interconnections** with Ultra-Precise Dispensing
- **Advancing AR/VR and CPO:** Inkjet Solutions for Next-Generation Optics

## AND 50+ PRESENTATIONS

- **Industrial inkjet & print production:** Colour control, printheads, RIPs, ink delivery, motion control, nozzle health, lab-to-fab
- **Curing, drying & surface treatment:** UV/LED, excimer technology, plasma and process integration
- **Advanced inks & applications:** Water-based, high-viscosity, 3D and direct-to-object printing
- **Quality & automation:** Colour measurement, dot-landing analysis and connected manufacturing
- **Printed & 3D electronics:** Sensors, liquid-metal printing, conductive components and smart surfaces
- **Sustainable manufacturing:** Bio-based binders and environmentally oriented digital fabrication

## 23 NOVEMBER SPECIALS

- **Epson Experience Center Visit**
- **Ink Delivery System Training**

## REGISTER NOW ONLINE

|                       |                |
|-----------------------|----------------|
| Standard delegate fee | 675 euro + VAT |
| ESMA member fee       | 575 euro + VAT |
| Academic fee          | 345 euro + VAT |

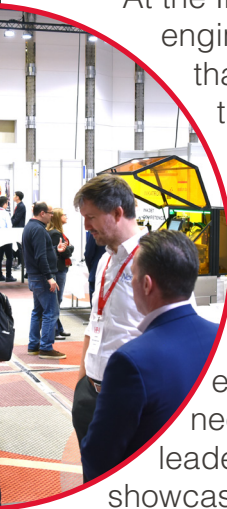

The fees include full conference and exhibition access, lunches, beverages and an evening reception at the end of day 1.

**Newcomers welcome!** Is this your first time attending the IPI conference? You're eligible for a 50% discount on the standard delegate fee. Request it at [mb@esma.com](mailto:mb@esma.com)

# INKJET PRINT INNOVATIONS

At the IPI Conference, we focus on engineering precision — the foundation that drives progress. In 2027, we take the next bold step: turning vision into reality. **IPI-X (Inkjet Print Innovations Expo)** is where we scale innovation to new heights.

Join us **16-18 November 2027 at Messe Essen** for a full-scale expo experience designed to connect pioneers, OEMs, and industry leaders like you. This is your platform to showcase groundbreaking solutions, forge powerful partnerships, and lead the industry forward.

Book your exhibition space now — and if you **commit by 31 October 2026**, you'll gain:

- Launch Partner status: Your brand featured in all IPI-X communications
- Up to 3m<sup>2</sup> free for previous IPI Conference exhibitors

Opportunities are limited — contact **info@esma.com** today to secure your place at the forefront of innovation. Let's build the future together!
